Campaign Metrics Reporting for Duty

Summer 2023

1

Campaign Metrics Report

Campaign Metrics Report

- Begin with a Configurable Joins, Message Base
- Collect basic Performance metrics: open rate, click rate, click to open rate by adding Data Columns for those counts and using formulas to calculate the rates

Campaign Metrics Report

App Completion

Metric	Total	Unique Opens	Open Rate	Unique Clicks	Click Rate	Click-to-Open Rate
Golden App Completion - Drip						
2023 T Golden App Started- Incomplete 12 Days - A Golden Edu...	1,936	1,405	72.6%	102	5.3%	7.3%
2023 T Golden App Started- Incomplete 15 Days - {{Preferred}}...	2,965	2,018	68.1%	102	3.4%	5.1%
2023 T Golden App Started- Incomplete 19 (every 7 days) - Your...	119	84	70.6%	3	2.5%	3.6%
2023 T Golden App Started- Incomplete 2 Days - {{Preferred}}: ...	3,552	2,601	73.2%	213	6%	8.2%
2023 T Golden App Started- Incomplete 5 Days - Finish your Min...	3,380	2,373	70.2%	184	5.4%	7.8%
2023 T Golden App Started- Incomplete 8 Days - Mines wants to...	1,975	1,431	72.5%	101	5.1%	7.1%
2023 T Golden App Submitted - Mines Application Submitted	1,459	1,393	95.5%	600	41.1%	43.1%
2023 T Golden Application Started - Mines Application Created	2,091	1,694	81%	225	10.8%	13.3%
Total	17,477	12,999	74.4%	1,530	8.8%	11.8%

Campaign Metrics Report

- Next, add a data table to house the rows for the mailings
- Add a subquery export, join Message Mailing within the export and add exports of Mailing Name and Mailing Subject OR UTM Term
 - If using UTM Term to distinguish email topics (recommended), use this as it's short and easier to draw conclusions at a glance
- Add your export row separator

Campaign Metrics Report

- Save and go back out to your original subquery export
 - Make sure to select “Show series total”
- You’ll now create a subquery filter
- Join Message Mailing
 - You’ll add either the Mailing Name or the Mailing Folder here
 - Best practice recommendation would be to have all your mailings for a particular campaign in one folder (this can be a secondary folder)
 - This avoids you having to select each mailing individually by name

Filters	Filter Join NOT (OR) Join Join
	Join Message Mailing

Campaign Metrics Report

- We recommend adding these filters to your whole report part at the top. This will allow you to easily have YoY data by using Archived in Yes versus Archived in No.
- We also wanted to see how emails after January 15 compared to emails sent prior.

Campaign Metrics Report

Now you're done with the **performance piece** of your campaign metrics report! On to conversions...

Campaign Metrics Report

- Begin with a Configurable Joins, Person Base
- Collect basic Conversion metrics
- Add a column for each count, as well as a column for each conversion rate
- Utilize Column Groups
- Add a variable name and subquery filter in each column related to the metric being collected

Campaign Metrics Report

App Completion

Metric	Applications						Conversion Rates				
	Created	Submitted	Completed	Accepted	Deposited	Net Deposits	App Submission	App Completion	Accept Rate	Yield Rate	Melt Rate
2023 Campaign											
App Completion	1,067	1,067	1,065	677	290	286	100.0%	99.8%	63.6%	42.8%	1.4%

Campaign Metrics Report

Edit Column

Name	<input type="text" value="Accept Rate"/> 
Type	<input type="text" value="Formula"/> 
Column Group	<input type="text" value="Conversion Rates"/>
Column Width	<input type="text" value=""/> e.g., 150px, 25%
Column Alignment	<input type="text" value="Left"/> 
Formula	<input type="text" value="@accept / nullif(@acp,0)"/> Example: @admits / nullif(@applicants, 0) If the denominator might equal 0, include the nullif function to prevent a divide-by-zero error.
Number Format	<input type="text" value="#.0%"/>

Campaign Metrics Report

- Next, add a data table to house the conversion data in rows
- Create a subquery filter
- Join Messages, then Message Mailing
- This is where you'll again either add the Name or Folder to select the same mailings as you did previously in your performance part
