

Slate Demo Series

Part 1 - Swipe Tracking in Slate

Presenter

Courtney

- + **Assistant Director of Student Success**
Implementations, Carnegie
- + **6 years of Slate experience**
- + **The Confident and Enthusiastic Thrill-Seeker**

Today's Goal

Part one of a three part series on **swipe tracking in Slate**. Today, we'll deep dive into entities.

+ today's agenda

1. What is an entity?
2. How to build an entity
3. Next steps for part 2

1

Demo of Swipe Tracking

2

Entities

What is an entity?

- “Entities are custom-built tables of grouped data points that are unique to your institution” - Knowledge Base Article on Entities Overview

3

Part two

Part two - form configuration

- Form configuration for checking in and checking out
 - Query String Parameters
 - Auto-submitting form
 - Matching criteria for Entities

Thank You!
